ABSTRACT OF THE DISCLOSURE

A piezoelectric/electrostrictive device ~~that includes a base 11 having a pair of right and left movable parts 11a, 11b and a fixing part 11c disposed at one end thereof, and as well as piezoelectric/electrostrictive elements 12a, 12b disposed on the sides of the movable parts 11a, 11b of the base.~~ Accordingly, the piezoelectric/electrostrictive device is fabricated to have a construction with fewer components. The piezoelectric/electrostrictive device having a construction with fewer components is provided by adopting a base ~~11~~ having an integral structure formed by bending an original plate stamped into a shape that delineates a plane development of the base, ~~as the base of the piezoelectric/electrostrictive device.~~
